# 60GHz Occupancy Detector Datasheet

#### **Product Description**

The 60GHz Occupancy Detection sensor can detect the usage status of the space. It is suitable for various spaces such as bathrooms, hotels and conference rooms. It has built-in intelligent learning algorithms to achieve accurate recognition.

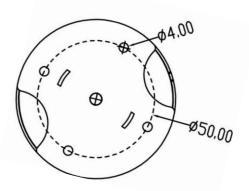

#### **Product Features**

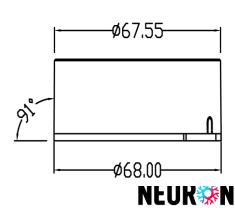

- > 60GHz millimeter wave radar technology with high accuracy
- 200-350cm effective detection distance with high sensitivity sensing, suitable for accessible toilets or conference rooms
- LoRaWAN connectivity, no wiring required
- IP65 Protection Rated
- Anonymous identification, zero privacy risk
- Built-in intelligent learning algorithms to filter detection of abnormal fluctuations and output detection results

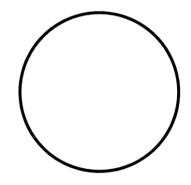

#### **Product Dimensions**

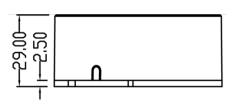

Unit: mm

### **60GHz Occupancy Detector Datasheet**

## **Specifications**

Probe	3DSQT-60GmmWave probe
Operating Temp.	-10 ~ 60°C
Operating Humidity	5% ~ 80% RH (non-condensing)
Response Time	<1s
Power Consumption	2.5W
Material	ABS
Detection Range	Maximum 3M*3M (centered installation)
Ingress Protection	IP65
Dimension	Ф65*25mm
Installation Height	200-400CM
