Reset to the factory settings	Green constant light → flickering	Release the button and wait	
	Off → constant light	Restore gateway to factory settings	

Power Supply for Products

The gateway supports 802.3af standard PoE or Type-C interface (5V, 1A) power supply. If both are connected at the same time, the PoE power supply is preferred.

PoE Switch

Note: You must connect the network cable at the gateway before connecting it to the PoE power supply device, otherwise it may damage the PoE device or the gateway.

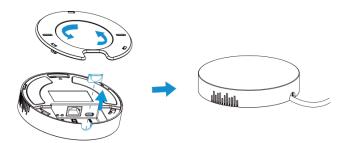

Installation

The gateway supports desktop placement, wall or ceiling mounting. Before installation, please ensure that the wiring is correct, and the product is configured and powered off.

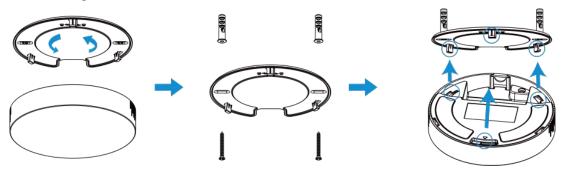

1. Desktop Placement

To use the device, unscrew the mounting plate counterclockwise on the back and place it on a desktop.

2. Wall or Ceiling Mounting

Remove the mounting plate on the back of the device counterclockwise. Drill two holes in the wall or ceiling, and then drill in the expansion bolts. Fasten the mounting plate to the wall with wall mounting screws.

3. Align the device with the mounting plate and turn it clockwise to snap it in.
